

Marcin Bosk

PhD Student at Chair of Connected Mobility,
Technical University of Munich

Email: bosk@in.tum.de

Website: <https://www.ce.cit.tum.de/cm/research-group/marcin-bosk/>

Current Research Areas

- Time Sensitive Networking
- In Vehicular Networking
- Deterministic Networking
- Named-Data Networking

Other interests

- 5th Generation Mobile Networks
- Network Slicing
- Discrete-event simulation

Open Questions

- How to approach and fulfil requirements of modern Time Sensitive and In Vehicular Networks?
- How to test Time Sensitive Networks and networks in general?
- How to realize naming schemes for modern In Vehicular Networks that are not relying on legacy standards?
- Can we adapt other protocols for Time Sensitive and Deterministic Networking beyond Layer 2 standards?
- Can we use Named-Data Networking in a time sensitive environment?
